Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Lamp base and a lamp having a base comprising multiple sets of contacts.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Behr et al (US 2002/0163288) in view of Alloway et al (US 6,467,942).

Claims 1, 2, 5, 6, & 8: Behr discloses a lamp having a lamp base (fig. 1) having a luminous means (fig. 1, 2) that is surrounded by a lamp vessel (fig. 1, 1), and having a lamp base that is fixed on the lamp vessel (shown fig. 1) and which has a base part (fig. 1, 6) that consists of an electrically insulating material (see "plastic part" in abstract) and is provided with two first electric contacts (fig. 1, 7 & 9) that are connected in an electrically conducting fashion to the luminous means.

Art Unit: 2879

Behr does not disclose a second set of electrical contacts connected electrically and mechanically to said first electrical contacts are arranged transverse to the longitudinal extent of the lamp.

Alloway teaches a lamp comprising a set of contacts that are arranged transverse to the longitudinal direction of the lamp in order to fit certain automotive designs (abstract).

Adding the set of electrical contacts transverse to the longitudinal direction of the lamp as taught by Alloway to the lamp as disclosed by Behr and electrically and mechanically connecting the two sets of contacts would be obvious to one of ordinary skill in the art at the time of the invention so as to allow connection to different types of automobiles with one device.

Claims 3 & 7: Behr discloses a lamp and lamp base as claimed in claims 2 & 6, wherein a set of electrical contacts are unipartite, angular contact lugs (fig. 1, 7 & 8).

Using both sets of contacts as unipartite, angular contact lugs would be obvious to one of ordinary skill in the art at the time of the invention so as to simplify design.

Claims 4 & 9: Behr discloses a lamp and lamp base as claimed in claims 1 & 5, wherein the base part consists of an electrically insulating plastic (fig 1, 6 and "plastic part" in abstract).

Contact Information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gabriel D. Olander whose telephone number is 571-272-6011. The examiner can normally be reached on 8:30-5.
